</table>

**Learning Objectives:**

Learn more about the biggest social network in the world. Use the film to start discussions about social networks.

**Pedagogical Approaches and Activities:**

Watch the clip and discuss with your students:

If they are on Facebook or another social network – how much time do they spend on the social network?

How much do they interact with others?

How can a company like Facebook or other social networks continue to grow?

How does Facebook make revenue?

How and how much data does it collect? Compare to other social networks.

If the students are part of Facebook or any other social network website. Experiment with the privacy settings. Search in the ‘terms of use’ for the terms ‘privacy and security’. Do you think that the privacy safeguards are sufficient to help you avoid some of the risks described in Module 7 unit 2?
